

BOSS-R Prime Contract | Biometrics Support

ID/IQ Contract No.: W91QUZ-09-D-0049

TEAM INTEGRAL LEADS IN BOSS-R TECHNOLOGY SOLUTIONS AND SUPPORT SERVICES

Team Integral is a prime contractor on the Biometrics Operations and Support Services – Restricted (BOSS-R) program for the Biometrics Identity Management Agency (BIMA). Team Integral has extensive experience in providing multimodal biometric solutions and related support services. We offer a full spectrum of biometric services and solutions to make our warfighters more efficient and effective in fighting the war against global terrorism.

With Team Integral's first-hand experience in supporting several federal agencies' biometric programs and a team of well-qualified, biometric-experienced companies, we offer biometric services in all the three BOSS-R Functional Categories:

1. Management Support Services
2. Independent Validation and Verification (IV&V)
3. Technology Management

TEAM INTEGRAL – A TRUSTED PARTNER WITH RELEVANT EXPERIENCE

Our team of specialized companies provides biometrics-related management services, IV&V and technology solutions. Each member of our team (Integral, CACI, STAR Technologies, GNS, Inc., and Vigilant Services) was selected based on their expertise and ability to bring technical and engineering resources to the BIMA to implement multiple, simultaneous projects. Team Integral has established technology partnerships with major biometric product and technology companies, including L-1 Identity Solutions, Cross Match, and Sagem Morpho, that helps us in accessing, evaluating, and implementing newer biometric technologies rapidly.

The BIMA can rely on Team Integral with a high degree of confidence because of our demonstrated experience. Our team members have participated in the formulation of biometric strategies and have served in direct liaison roles between key stakeholders in the Military Services, the Office of the Secretary of Defense (OSD), the BIMA and other defense agencies. Team Integral offers a true partnership where we can assist our clients in achieving their key objectives in the most effective manner. We use innovative approaches and state of the art technologies in solving our client's problems, and we have the passion to exceed our client's expectations.

PARTNERS

CACI provides professional services and IT solutions needed to prevail in the defense, intelligence, homeland security, and federal civilian government arenas. CACI has extensive experience across DoD providing biometrics-based identity management services and solutions. CACI currently supports BIMA in its mission as the DoD proponent for biometrics, as well as the PM DoD Biometrics under the Army Program Executive Office - Enterprise Information Systems (PEO EIS) in its role to develop materiel biometric solutions. CACI also provides biometrics and forensics analytical support for the Army National Ground Intelligence Center (NGIC) and various U.S. combatant commands.

Star Technologies has extensive experience in Information Assurance, Biometric approaches, policies/procedures, and user requirements and proven experience in independent validation and verification, test plans, and technical analyses and recommendations for enhancement alternatives. Star is also uniquely qualified to provide engineering support for the development, integration and evaluation of biometric solutions.

GNS is an 8(a) certified, woman-owned SDB providing objective, knowledgeable, rigorous IV&V, and security related support. It provides in-depth review and analysis of IT security policy and system documentation. GNS is experienced in C&A, critical infrastructure protection (CIP) for national security systems, and assists with the review and evaluation of operating unit IT security program management and planning practices for compliance with government security program policies.

Vigilant is a Veteran-Owned small business uniting technical innovation and business strategy by providing information management, information technology and information security solutions to the Federal Government including the Department of Justice and the Bureau of Engraving and Printing.
