INTEGRAL Consulting Services, Inc.

CMMI-DEV/3 and CMMI-SVC/3 Appraised
ISO 9001, ISO 20000 and ISO 27001 Certified

Cybersecurity

Integral provides the full range of cybersecurity solutions for our clients in support of their mission. Our key areas of expertise are highlighted below.

Security Engineering

- Security hardening of all hardware, software, network components through secure architecture, design, and integration of security technology
- Secure coding and code reviews through advanced static application secure testing (SAST) tools and manual testing

Cyber Perimeter Network Defense

- Defense-in-depth approach to secure all layers of the operational environment – perimeter, network, endpoints, application, data, and mission critical assets – understanding fully the evolving nature of threats and attack surface due to advances in technology and user adoption

Cybersecurity Operations

- Vulnerability analysis, intrusion detection, and mitigation
- Continuous network security monitoring and protection
- Security incident analysis and response
- Tier 2 and Tier 3 Service Desk support for cybersecurity

Security Assessment, Validation, and Compliance

- Security assessments to ensure end-to-end information assurance and compliance with security frameworks and controls such as NIST Risk Management Framework (RMF) NIST SP 800-37, NIST Cybersecurity Framework, NIST SP 800-53, FISMA, and FedRAMP compliance.
- Complete Assessment and Authorization (A&A) support to obtain and maintain Authority to Operate (ATO)

Proven Past Performance

Integral provides cybersecurity services to the following clients:

- Defense Forensics and Biometric Agency - Information Assurance, Retina Scanning, Network Security, Intrusion Detection and Cyber Threat Analysis and Remediation
- DHS Immigration and Customs Enforcement (ICE) – Network Monitoring, Intrusion Detection, Vulnerability Analysis, Cyber Incident Management, Remediation, Auditing and Reporting
- Defense Information Systems Agency (DISA) – Security Engineering, Security Architecture Development, Documentation, Cybersecurity Strategy Development, Mitigation and Response, and A&A support
- Consumer Product Safety Commission (CPSC) – Cybersecurity Program Management, Security Engineering, Policy Development, Vulnerability Assessments and Mitigation, Threat Analysis, Incident Management, and Reporting
- DHS Federal Law Enforcement Training Centers (FLETC) – Security hardening of hardware, software and applications, security scanning, security patches, intrusion detection
- Defense Intelligence Agency (DIA) – Technology targeting and risk assessment, Capstone threat assessment, cyber research and development infrastructure, Cyber Intelligence Analysis
- USDA National Agricultural Statistics Service (NASS) - Testing of all NIST 800-53 Rev. 4 controls
- Army Intelligence and Security Command (INSCOM) - Cyber Analysis Support Services
- Army INSCOM National Ground Intelligence Center (NGIC) - Threat Network Analytics Support

Updated 08/2019

About Us

Integral provides the full range of IT, cybersecurity, biometrics and program management support to Federal agencies in continental United States (CONUS) and Outside CONUS (OCONUS) locations. We make it an imperative to provide the highest-quality services on every project, as evidenced by our industry-recognized quality certifications—International Organization for Standardization (ISO) 9001, ISO 20000, and ISO 27001 certifications, and Capability Maturity Model Level (CMMI) Level 3 appraisals for Services (CMMI-SVC) and Development (CMMI-DEV).
