

Intelligence Analysis

We leverage our knowledge, expertise and analytical approach to make our client's mission successful by providing single and all-source intelligence support from planning and collection to intelligence analysis and counterintelligence.

With over ten years of experience providing all-source intelligence analysis, Identity Intelligence (I2) tradecraft, Human Intelligence (HUMINT), Signals Intelligence (SIGINT), Geospatial Intelligence (GEOINT), Counterintelligence support, Open Source Intelligence (OSINT) analysis, we have successfully served several federal clients, including Army National Ground Intelligence Center Biometric Intelligence Program, Defense Intelligence Agency Defense Source Registry, Department of Homeland Security (DHS) Immigration and Customs Enforcement, Defense Forensics and Biometrics Agency, Army Intelligence and Security Command, and other DHS agencies and the Intelligence Community (IC).

Identity Intelligence (I2)

- ❖ Design and implement Identity solutions using multimodal biometrics (face, fingerprint, iris, palm and heartbeat) to support intelligence operations and analysis
- ❖ Apply Biometric-Enabled Intelligence (BEI) and Forensic-Enabled Intelligence (FEI) to perform Identity Matching and Resolution functions
- ❖ Develop and cleanse the Biometric Enabled Watchlist (BEWL)

About Us

Integral Consulting Services, Inc. develops multimodal biometrics solutions, performs all-source intelligence analysis, implements IT Service Management (ITSM) solutions, provides IT helpdesk support, develops custom applications, and assists in cybersecurity protection to federal civilian and defense agencies and Intelligence Community. We are committed to helping our clients achieve their mission objectives by providing the highest-quality solution, backed by our core competencies, qualified and experienced staff, and CMMI-DEV/3, CMMI-SVC/3, ISO 9001, ISO 20000 and ISO 27001 certifications.

All-Source Intelligence Analysis

- ❖ Robust experience with analysis across multiple major intelligence disciplines (OSINT, HUMINT, SIGINT, GEOINT)
- ❖ All-source intelligence and counterintelligence analysis, targeting and production
- ❖ Experience with intelligence production standards and policies at the national/international level (IC Directives, Standardization Agreements, Joint Pubs)
- ❖ Established Biometric-Enabled Intelligence, Forensic-Enabled Intelligence and Identity Intelligence analysis for the Department of Defense

Intelligence Analysis Training

- ❖ Policies, standards, and training development for BEI, FEI, I2, and all-source analysis
- ❖ Extensive experience with The Foundry Program and US Army Intelligence Center of Excellence (USAICoE) approval processes for training courseware

Open Source Intelligence (OSINT)

- ❖ Center of Excellence for OSINT offering training, intelligence analysis and comprehensive data analytics using social media sources
- ❖ Extensive experience with OSINT collection and analysis
- ❖ Accredited and certified personnel with CASO, US Army OSINT Office OS301 & OS302, Advanced OSINT Intelligence Course
